OIL SAFE CONTAINERS

Designed specifically for lubricants, Oil Safe containers reduce new lubricant contamination. Color coded lids for easy lubricant identification make Oil Safe unique. Lids are designed to be interchangeable with all Oil Safe jugs. Four lid options are offered, ensuring most required applications are covered. The “down stroke” hand pump dispenses one litre for every fourteen strokes.

Open containers and gas cans are no longer accepted as a proactive lubrication practice!

Features

Designed for lubricants
Lids and jugs are all interchangeable
Five lid options for most applications
Down stroke hand pump

Color coded lids for easy identification
Pour lids seal to prevent ingress
Five jugs sizes: 1.5, 2, 3, 5, and 10 Litre
